

September Webinars

Join us for any or all of the complimentary webinars we have scheduled for September. Each of these webinars will earn one LU/HSW credit. Registration is simple. Just click on the link on the course(s) you want to attend, and you will be taken to a registration website. Prior to the webinar, you will receive an e-mail with the directions on connecting to the webinar.

September 14, 2021 - 12 pm CST

[Managing Condensation, Water Intrusion and Energy in the Real World](#)

Window opening air and water leakage has been a difficult problem for the construction industry. This course evaluates building failures, conventional construction approaches, and new developments in waterproofing techniques to show a path forward for designers seeking higher-performing wall assemblies

September 21, 2021 - 12 pm CST

[Intro to Existing Building Retrofits](#)

This program introduces building retrofits as a method to achieve green building standards by adapting existing structures. While a building retrofit may have several types of interventions, participants will learn how effective air sealing will improve overall occupant comfort, health, and safety. This includes a detailed look at sources of air leakage and the various methods to address this infiltration. Several real-world examples will demonstrate the importance of identifying source of air leakage, investigating existing conditions, and proper detailing.

September 28, 2021 - 12 pm CST

[Challenges of Blindsided Waterproofing](#)

This presentation provides an overview of the management of below grade blindsided waterproofing. The course will cover common problems and methods to address the problems. The importance of communication and coordination with all impacted parties will be emphasized. Additionally, the management of Quality Assurance issues will be discussed.

These presentations are brought to you by [PROSOCO](#), [CETCO](#), and [Mortar Net](#).
